

Call for Papers

Project Management Symposium on Sustainability, integrated in the PM SUMMIT Lisbon 2022

PMI Portugal – that is the official representative of the Project Management Institute in Portugal - with the support of “Escola Superior de Tecnologia e Gestão do Instituto Politécnico do Porto”, “Universidade Autónoma de Lisboa”, “CEFAGE - Centro de Estudos e Formação Avançada em Gestão e Economia da Universidade de Évora” and “Escola de Engenharia da Universidade do Minho” are promoting the organization of an academic symposium on the theme of Sustainability in Project Management, an event that will take place as part of the PM SUMMIT Lisbon 2022.

Book now the date of 22nd SEPTEMBER 2022 if you want to participate in the event, which will take place in LISBON.

A platform was launched to manage the proposals for articles to be presented and the publication of the book of minutes (with ISBN) is already guaranteed, also with the objective of ensuring that the best articles may be published in reference journals (Scopus and/or Web of Science).

We intend to lay the foundations so that the scientific community in the area can encourage publication by students, especially about sustainability, and so that we can have a recurring event of community meetings where scientific discussion can take place in these subjects.

We already engaged more than 80 notorious academics and professionals on the Scientific Committee of the event.

Articles can be submitted in English or Portuguese on the following platform:

<https://easychair.org/conferences/?conf=pmsymposium2022>

If you have never used EasyChair, you will have to configure access via the “Create an account” option.

The planned topics are:

Project Management social responsibility
Project Management economic responsibility
Project Management environment sustainability
Sustainability programs
Corporate sustainability projects or programs
Environment projects or programs
Social responsibility projects or programs

Sustainable portfolio management
Not-For-Profit projects or programs
Recycling projects or programs
Energy management optimization
Scarce resources management
Sustainability in social innovation projects
Sustainability in fourth sector projects
UN sustainable development goals

Others may be proposed to the email jap@estg.ipp.pt

In a first phase (until the 6th June 2022), an extended abstract of 1000 to 1500 words must be submitted, which must follow the following structure:

title, objective of the article, methodology, results, theoretical implications, practical implications, limitations, innovation.

3 to 5 keywords and a list of references must be included, which do not contribute to the word count. The extended abstracts will be reviewed blindly by the members of the scientific committee, so the authors must not be identified in the text.

The extended abstract must be submitted in a PDF file or using the EasyChair platform without identifying the author(s), including file signatures.

References must follow the APA style.

After the review by the Scientific Committee, the author(s) will receive information about its classification and improvement suggestions and to proceed to the symposium presentation or to the presentation of an abstract or poster.

Thanks in advance for your work,

Iolanda Rocha
Project Manager
Organization Committee Member
PM SUMMIT Lisbon 2022 Symposium on Sustainability
